## Social Chair Needed

Although the Christmas concert is proceeding thanks to last-minute volunteers, other social events, like the annual sleigh ride, summer BBQ, and Halloween party, are on hold until someone, or preferably a couple of people, volunteers to act as Social Chair.

Marilyn Gaa has retired from this position after an outstanding 5-year stint, but she has created a comprehensive manual to help orient the new Social Chair. All you need to do is bring your imagination and flair for entertaining; the League pays the bills!

## Membership Drive

We would like to extend a big "Thank You" to all 54 of our volunteer canvassers, several of whom were new this year. They did a wonderful and enthusiastic job covering the whole community, and their dedicated efforts help ensure that Windsor Park remains a strong and vibrant neighborhood.

Sarah Nyland and Robert Gariepy reported that 200 paying and 82 honorary Community League members were recruited this year. There were \$1,148 in donations, creating a grand total of \$6,502. Of 478 potential memberships, 59% joined, including the SWAT (South West Athletic Teams) hockey memberships from early August. We have the distinction of being one of Edmonton's most popular Community Leagues!

### Skating Rink

The Heritage Classic Hockey games brought back attention to the value of our outdoor rinks in our communities.

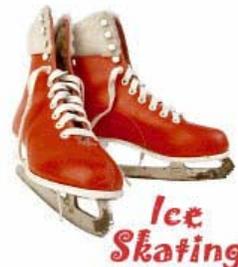

There they were, our hockey heroes, remembering how long ago they started their careers on an outdoor rink, whether in their back yards, the local pond or at their community rink. The fun of lacing up our skates and meeting our neighbors and friends at our local community rink has not changed. We just don't seem to do it as much as we used to. Whether it's a game of shinny, or skating around to our favorite tunes... we remember. That's why we all got so excited about the Heritage Classic! Will our families have these same memories of winter fun on the ice? Outdoor rinks are not just for our hockey heroes. We all can experience the snap of the ice,

the clean smell of being outdoors, getting some physical exercise and plain old traditional fun. If you haven't been there lately, get out to your local community outdoor rink. The benefits are endless!

### Guidelines for Using the Rink

Windsor Park school has priority during the weekdays, so please yield the ice to them if they request it. Also, a schedule identifying when skating classes have booked the rink is posted on the change room door. Community League members have priority over any other groups and can ask them to share the ice as necessary. Finally, users are expected to shovel and scrape the ice as necessary. Happy skating!

### ***Stop Shovelling Food and Start Savouring It***

"Don't gulp your food—it's not a race!" Turns out, Mom was right. Wolfing down your food increases your chances of feeling the burn of acid reflux.

Gastroesophageal reflux, or heartburn as it is commonly known, is a condition that feels exactly like it sounds—a burning discomfort in the chest, just behind the breastbone. It's caused when acidic stomach juices flow backward into the esophagus.

Millions of people suffer from this condition, which occurs when the natural valve that keeps stomach acid in the stomach and out of the esophagus relaxes or is not functioning properly. While the stomach is naturally protected from the potent acids it produces to help the body break down food, the esophagus is not, so when these acids hit its skin-like lining, you feel the burn!

In addition to eating too quickly, other causes of heartburn include: being overweight; drinking acidic, alcoholic, caffeinated or carbonated beverages; eating fatty or acidic foods; lying down or bending over after eating; munching before bedtime; overloading on large portions; pregnancy; smoking; certain drugs; wearing restrictive clothing; and stress.

Left untreated, chronic heartburn can lead to gastroesophageal reflux disease

(GERD), a condition that results in inflammation or ulceration of the esophagus and can lead to symptoms of wheezing, hoarseness and chronic cough. In extreme cases, GERD

sufferers can develop Barrett's esophagus, a disorder marked by severe damage to the lining of the esophagus that has been linked to an increased risk of esophageal cancer.

Fortunately, a healthy lifestyle and proper medication can keep the burn at bay. Talk to your pharmacist or physician for advice on how to prevent or treat your heartburn.
